

Bands and Seller

Is it possible to have my shop in a different language - english or german?

If you want to change your shop to a different language you'll have to add "&language=en" to the URL of your shop (if you want english as the main language) it's otherwise in german. YOu can find your own personal Shop URL in the integration menu of the admin area. But beware this URL is also part of the frame code and it therefore has to be changed as wel.
